Cradle to Cradle Products

Three Cradle to Cradle Wall Coverings

By Charlotte O'Malley

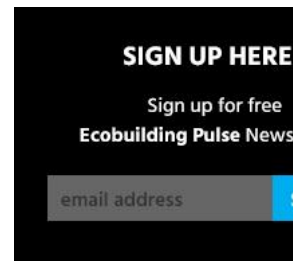

These three innovative wall coverings are LEED Material Ingredients Credit or LEED Disclosure Credit Eligible, and have been catalogued in the Cradle to Cradle Products Innovation Institute's [certified products registry](#).

1. Biobased Xorel

Carnegie Fabrics, Inc. spent seven years developing this bio-based high performance interior textile—the first in the world. This plant-based wall covering offers the same performance attributes as standard Xorel, but with a significantly reduced [carbon footprint](#) and a bio content between 60 - 85%. Carnegie's first launch of the product offer 6 designs in 91 colorways, and has achieved [C2C Gold Certification](#). Watch their video to learn more about the product:

2. Bark House® Poplar Panels (Interior Use)

Highland Craftsmen is the original manufacturer of nationally-acclaimed Poplar Bark Shingles. Bark House shingle siding was the first product HC® ever developed, and has remained a beautiful, flexible design element for modern and rustic homes alike since 1990.

The unique and rich look of Poplar Bark shingles is especially dramatic indoors. Bark House Poplar Panels can be quickly applied to drywall or plywood and make a strong (and sustainable) design statement as an accent wall in a home. They also are LEED Disclosure Credit Eligible, and a [C2C Certified Silver product](#).

Harvested in the same manner as our shingles, timing and skill are critical to the success of unrolling an unbroken full cylinder from a log. No two are ever alike. Limb scars, epicormic knots, growth stress, bird peck, and lightning scars are all textural variances that can be present that give each sheet its own unique identity. One can even tell directions the bark faced by the distinct color changes that flow from the north side to the south.

The video below doesn't focus on Highland Craftsmen interior panels, but showcases the beautiful Poplar possibilities their products provide for a home's interior or exterior:

Rock Ridge Productions (Highland Craftsmen)

3. Mosa Murals

Mosa is a Dutch tile manufacturer with over 130 years of experience offering unique and distinct tile concepts for walls, floors, facades and terraces. Aside from the many international design awards the company has received, Mosa also manufactures its entire collection with sustainable production methods in accordance with the ISO 14001 environmental care system.

Mosa Murals is a unique collection for ceramic walls consisting of three series: Blend, Lines, and Change.

Each mural has an individual character and signature, and is designed by balancing size, tone, colour and surfaces in a preselected or custom-designed grid. The resulting pattern is a ceramic wall, layered across multiple dimensions.
