## Poplar Bark House Shingle Siding by Highland Craftsmen

by Highland Craftsmen

By [Katy Tomasulo](#)

From: [New + Notable](#)

Poplar Bark House shingle siding is made with bark that is removed from yellow poplar trees before they are shipped to sawmills for use in furniture and other manufacturing. The shingles are kiln-dried to prevent shrinking and cracking, and they contain no chemical additives. They resist infestations and can meet municipal building-code standards for flammability, the company says. 828.765.9010. [www.highlandcraftsmen.com](http://www.highlandcraftsmen.com).
