- mobile/fixed screens
- ceilings panels
- feature floor panels
- stair treads
- countertops
- table tops
- doors
- reception areas

Luminoso

Luminoso takes premium cuts of wood and treats them in a new light, embedding fiber-optic waveguides between 2 layers of your preferred wood species. This creates a fully sealed surface for use as flooring, wall partitions, ceiling work, furniture and screens. Luminoso is great for hospitality, retail, and corporate environments. The applications for architecture and interior design are numerous and diverse, with even the basic Luminoso panel creating a unique canvas for shadow-play and interaction between different spaces.

Benefits and Facts on Luminoso:

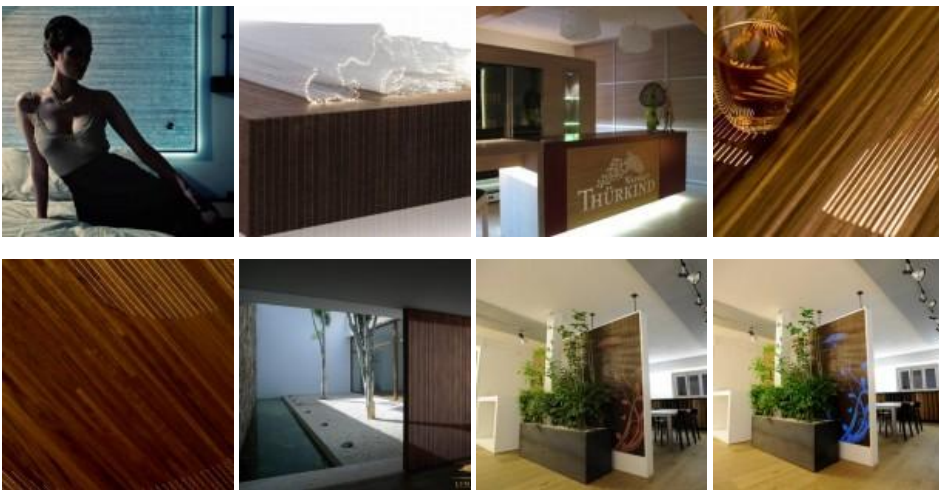

Available in 7 wood finishes: black cherry, oak, mahogany, teak, wedge, hard maple and black walnut

Can be finished with either lacquer, satin, oil or wax finish.

Panel sizes include: 119"x20", 119"x39" and 119"x49".

Water Resistant

Low VOCs

HPLs and Phenolic Panelings

Arpa Phenolic Paneling

ARPA is a decorative high pressure laminate (HPL) and phenolic panels which are used in virtually any industry from furniture manufacturing to luxury coach and yacht interiors. The evolving collections are based on technical research combined with the inspiration of nature and its colors. Arpa laminates are available in over 550 patterns and textures. Arpa's HPL material is hygienic, scratch and heat resistant and is anti-static.

Laminati Architectural High Pressure Laminates

LAMINATI High Pressure Decorative Laminates are manufactured for interior horizontal and vertical applications. Typical applications include work surfaces, table tops, commercial furniture, case goods, store fixtures, as well as wall panels, cabinet walls, doors, toilet partitions, elevator cab interiors, millwork in restaurants, retail stores, and airports. LAMINATI offers an extensive palette of vivid solid colors, woodgrains, metals and laminated veneers, plus a wide range of realistic finishes to achieve any design. LAMINATI stocks a large inventory of the entire color palette in order to guarantee quick and effective deliveries. To see the LAMINATI collection, click [here](#).

Parklex Wood/ Phenolic Panels

Parklex is an international manufacturer of architectural phenolic paneling. Parklex provides contemporary application solutions for facades, walls, ceilings, and floorings. Parklex surfaces are made from 100% natural wood that comes in a variety of finishes and colors in natural and dyed panels. The entire Parklex line is classified according to the new European standard EN 13.501-1:2002 regarding reaction to fire, obtaining the best results possible for organic materials. Parklex products are also moisture resistant, UV radiation and weathering resistant, and scratch /abrasion resist

Solid Surfaces

Durat

Durat is a unique, ecological solid surface material which contains recycled post-industrial plastics and is 100% recyclable. Durat is available in more than 70 vibrant colors. Custom colors can be tinted to order. Durat can be used to create seamless surfaces of any custom project. Easy maintenance and hard-wearing properties make it an ideal material for various kinds of interiors, such as bathrooms, kitchens, and public spaces.

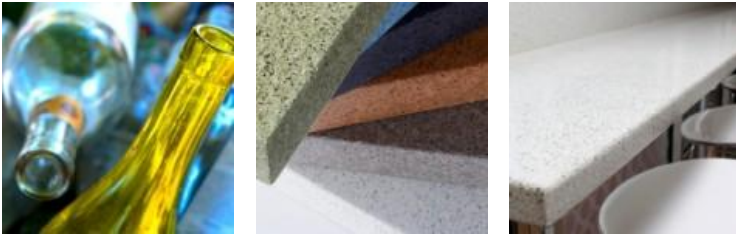

Meld

At **Meld**, our product development team excels at creating innovative and award winning materials that challenge traditional concepts and form sensible concrete solutions. After years of focusing on custom manufacturing and installations, we are now offering our **ecoX**, **micro** and **Xposed** materials in slab form via our expanding nationwide distribution and fabrication network. As part of this network, Meld is making sustainability readily accessible by offering numerous advantages over our custom division:

- Reduced lead times
- Cost effective sustainable surface solutions & installations
- Support for local businesses and economies
- Minimized waste via our standard & custom slab program

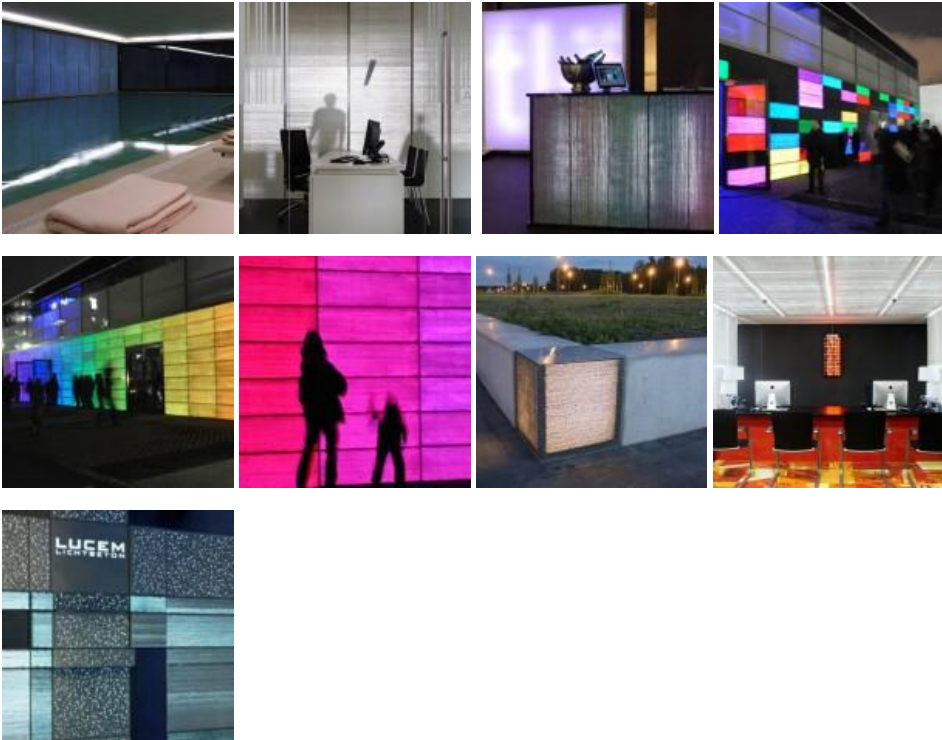

Lucem

Lucem light transmitting concrete appears in various applications as an elegant and modest light source. Lucem translucent concrete is produced using high density concrete that is imbedded with fiber optics. It is a highly versatile surfacing material that is suitable for interior and exterior application. Use Lucem for any project, from hospitality to healthcare and retail to commercial. Lucem is a great application for bars, flooring, divider walls, architecture focal walls, and exteriors.

Benefits and Facts on Lucem:

- (3) concrete mixture finishes: white, grey, and dark grey
- Available in (2) textures: lines and starlight
- Custom unique prints can be produced
- Lucem panel size is 2'x4'
- UV Resistant
- Fire Resistant

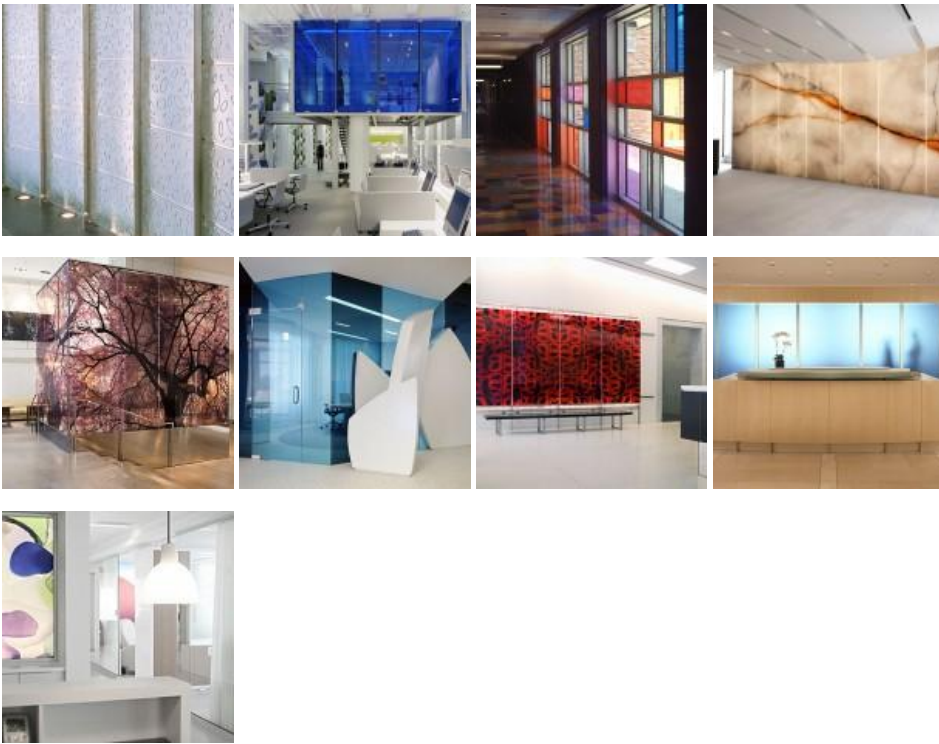

Specialty Glass

Pulp Studio Glass

Pulp Studio provides unlimited design capabilities that can achieve unique options for each specific job. From decorative glass products to specialty glass products to hardware, Pulp Studio offers a wide variety of products to suit your needs. Pulp Studio can provide you with laminated glass that includes our fiber series, textures, colors, graphics, photographic elements and a variety of other substrates.

Pulp Studio products provide safety glass with enhanced UV protection, sound attenuation and superior maintenance qualities. Each piece of Pulp Studio glass is individually fabricated to size from your customer's specifications.
