PANELS POPLAR BARK WALL

Coatings of poplar bark

A truly unique panel for wall decoration

PANELS POPLAR BARK WALL

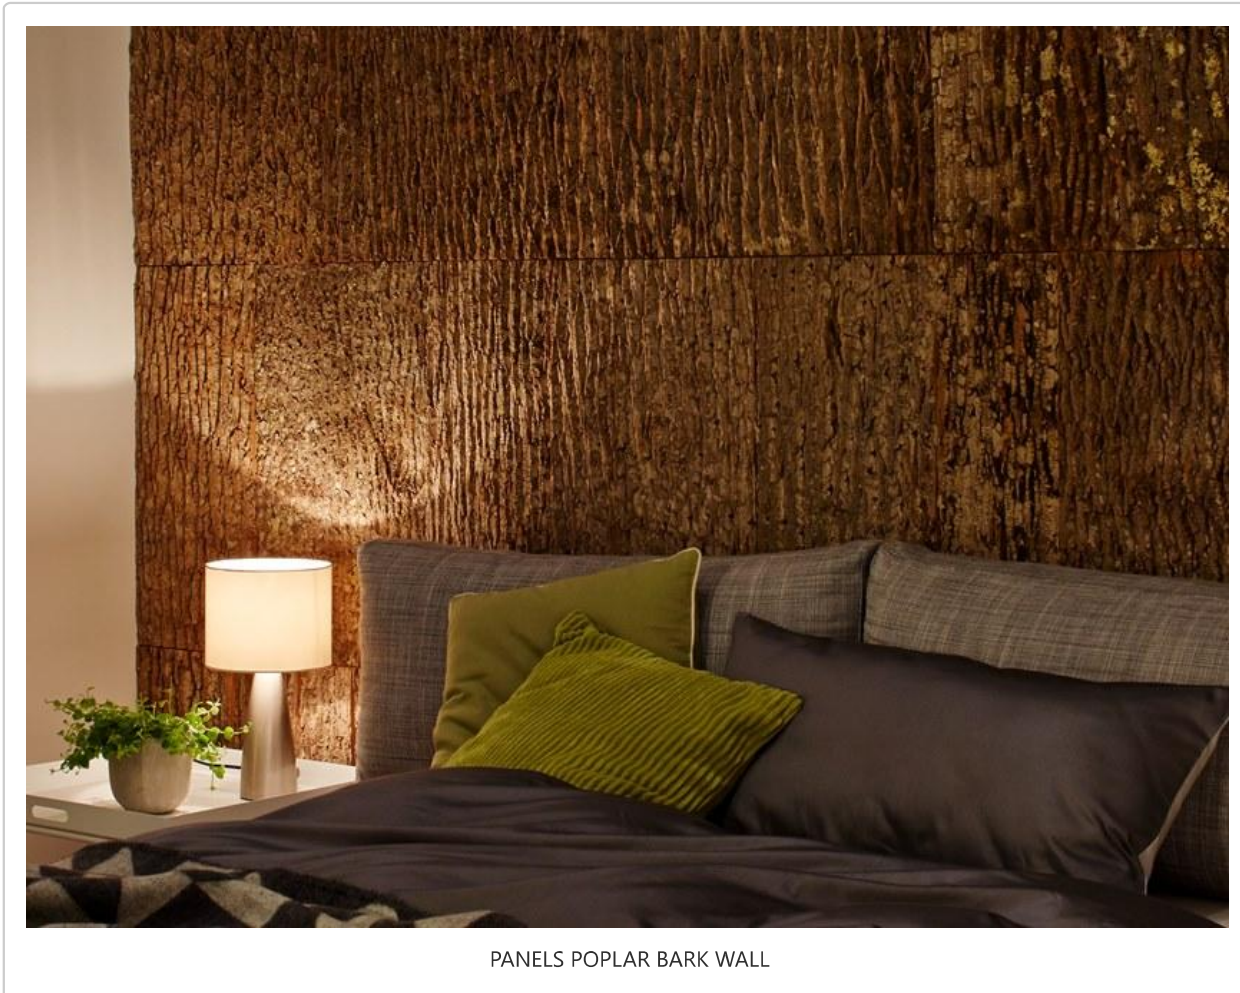

The poplar is a willow and can grow up to 30-45 meters in height. High quality masts are up to 40 mm thick (premium version), the smaller shafts have a flat structure up to 20 mm (standard version). After being worked, the bark is used as a whole piece and does not adhere to other support panels and therefore is suitable for both interior areas and facades. Each sheet is unique.
